

PIXALARM PERIMETER

INTRUSION DETECTION SERVER FOR SENSITIVE AREAS

SECURE YOUR SITES :

PixAlarm is an all-in-one intrusion detection server, with video streaming and recording capabilities.

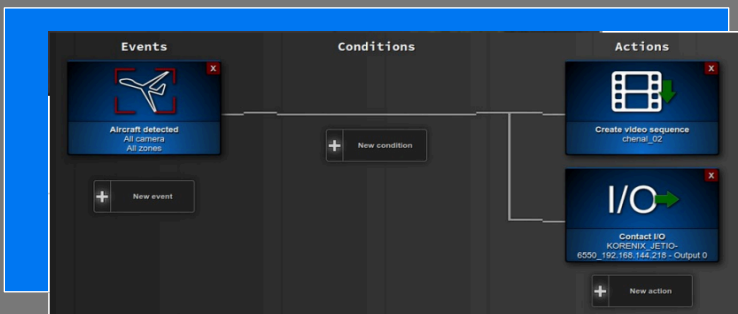

Based on InPixal algorithms, **PixAlarm** performs efficient detections over video streams in real-time, with no false alarms.

Thanks to an intuitive user interface, **PixAlarm** allows users to get the best from your existing cameras: IP, Analog, SDI, visible light or thermal.

MANY FUNCTIONS, ONE PRODUCT

FEATURES :

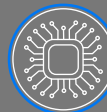

- Detect and track humans
- Detect and track vehicles
- Stream all connected cameras
- Notify external services (FTP emails, VMSs,...)
- Unlimited direct IO: light, sirens, etc
- Replay alarm videos, associated with geolocation
- Auto-detect cameras defaults (low light, tampering, blur).
- Permanent recording of incoming videos

Third Party integration

Robust detection in all conditions

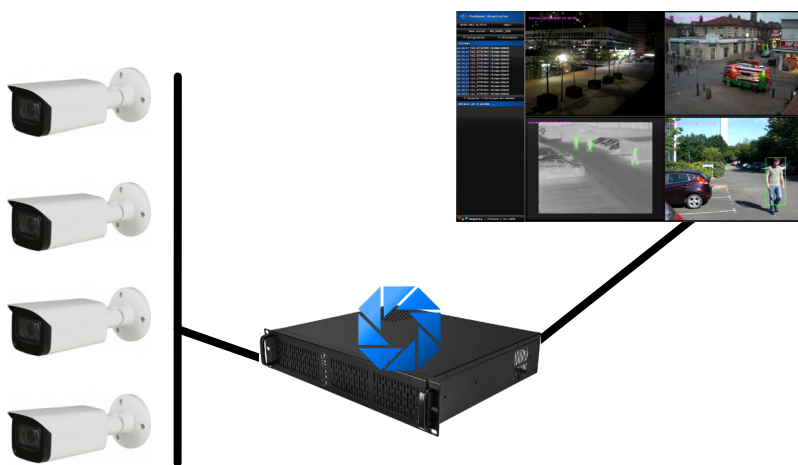

Innovative algorithm

PIXALARM PERIMETER

INTRUSION DETECTION SERVER FOR SENSITIVE AREAS

Server	PixAlarm : short 2U rackable server or rugged server
	Input : camera IP, PAL, or HD-SDI
	1 year of free support and 3 years guarantee included
Dimensions	177mm x 580mm ou 260 x 200 x 85 mm
System features	Unlimited on-board dry-contacts modules (PIXALARM-MONO and PIXALARM-4)
	2 x Ethernet 1Gb interfaces on all products, RS-232 / RS-422 / RS-485
	Embedded Linux OS from INPIXAL, enhanced SW security against external attacks
